

Satyadev PYTHON TEST

1.Reverse a string without slicing:
"Hellow World"

>>>>

?

2.Count words in sentence:
"A Quick Brown Fox Jump Over the Lazy Dog"

>>>>

?

09/20

3. Remove duplicate characters.
"Carrot"

>>>>

?

4.What is difference between lists and sets?

>>>> Lists		Sets
1. ordered ✓		1. unordered ✓
2. allow duplicate ✓		2. no duplicate ✓
3. mutable ✓		3. mutable ✓
4. indexed ✓		4. no indexing ✓

①

5. Can sets contains lists? If Yes How If no why?

>>>> no
lists are mutable while sets element must must be immutable.

✓ ①

6. Why sets are faster?

>>>>

?

7. Difference between remove () and discard ()

>>>> Remove()		Discard()
1. uses list and set ✓		1. uses only set ✓

①

8. How many methods to insert elements in the list? Total Method?

>>>> +

append ()

insert ()

extend ()

9. How many methods to delete elements in the lists? Total Method?

>>>> remove ()

pop ()

clear ()

del ()

pop(n)

10. How many Operators in Python Write their name in Explain?

>>>> 1. arithmetic operators

2. comparison operators

3. assignment operators

4. logical operators

11. Write precedence Rule of arithmetic in Python?

>>>> 1. ()

2. **

3. */ // %

4. + -

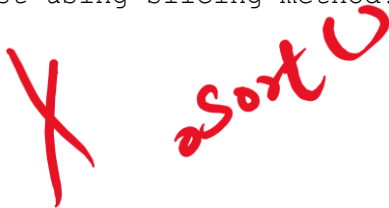

12. How to sort elements in list using slicing method?

[5,11,14,7,8,3,2,5,9]

>>>> x = [5,11,14,7,8,3,2,5,9]

print(sorted(x))

print(sorted(x)[::-1])

13. What is Dictionary

>>>> Dictionary is a collection data type in python used to store data in key-value pair.

14. How many methods to create dictionary?

>>>>

15. How many methods to access value in dictionary?

```
>>>> []
      keys()
      value()
```

keys
.get()

16. How many methods to delete elements in dictionary?

```
>>>> pop()
      popitem()
      clear()
      del()
```

17. How to perform mathematical operations in sets write method name?

>>>>

18. What is packing variable in tuple? Explain using example?

```
>>>> packing means storing multiple values in one tuple
      t= 10,20,30
      print (t)
      (10, 20, 30)
```

19. What is unpacking variables in tuple? Explain using example?

>>>>

20. Difference between sets and dictionary?

>>>>

SETS

- 1.set stores only value
- 2.no duplicate values

DICTIONARY

- 1.stores key value pair
- 2.keys are unique
